

- The GPS 72 is a low-cost solution for land or marine navigation designed to provide precise GPS positioning using correction data obtained from the Wide Area Augmentation System (WAAS).
- The GPS 72 can provide position accuracy to less than three metres while receiving WAAS corrections. This rugged, waterproof, unsinkable GPS receiver offers a large, 4-level greyscale screen.
- Its designed as the next generation in basic, entry-level Garmin GPS.
- 500 user waypoints with name and graphic symbol; 50 reversible routes
- 1mb internal memory for loading MapSource Point of Interest data.
- Trip computer provides odometer, stopped time, moving average, overall average, total time, max speed, and more
- Automatic track log; 10 saved tracks let you retrace your path in both directions
