

Geko 201

- Gekos are the smallest and lightest GPS units on the market – inexpensive, with sleek designs and simple operating systems.
- With its distinctive canopy-green case, the powerful Geko 201 allows more waypoint and route storage, as well as available PC and external power connectivity, and built-in WAAS capability.
- In addition, the Geko 201 boasts a user-configurable trip computer, 10,000 trackpoints, a new upcoming-turn feature, as well as PanTrack™ and TracBack®.
- The Geko 201 also includes four fun, interactive games that transform the great outdoors into a virtual board game. Enjoy a good workout while chasing a virtual lizard in Geko Smak, match symbols in a grid version of Memory Race, navigate to reference points without crossing one's trail in Nibbons, and collect symbols along a path in Virtua Maze.
