

eTrex Summit

- The all in one navigator device for the outdoor enthusiast is the first combination GPS, altimeter and electronic compass. The electronic compass provides bearing information when you are standing still and the altimeter determines precise altitude, so you can tell how high you've climbed and your rate of ascent.
- The eTrex Summit was designed for both marine and recreation use.
- Like its predecessor, the eTrex Summit boasts a powerful 12 parallel channel GPS receiver and comes packaged in a small, sleek case with operating buttons located on either side of the unit.
- The case is completely waterproof to withstand immersion in one metre of water for up to 30 minutes.
