

eTrex

- The eTrex takes the best features of a 12 parallel channel GPS receiver and puts them into a 170g package that is only 10cm high and 5 cm wide.
- All the buttons are located on either side of the unit, allowing for simple, one-handed operation but won't obstruct your view of the display.
- The eTrex will store up to 500 user waypoints with graphic icons and boasts Garmin's exclusive TrackBack feature that will reverse your track log and help you navigate your way back home.
- The eTrex uses animated graphics that will help you identify your marked waypoints quickly and easily.
- The unit will run for 22 hours on just two AA batteries.
- The eTrex is completely waterproof so it can take an accidental splash or dunk in the water and still continue to perform.
