

## GoBook Q-200

### The Standard in rugged mobile computing solutions

- The GoBook Q200 is a versatile, ergonomic, ultra-rugged, and environmentally immune handheld computer running the Windows CE. NET 4.2 operating system from Microsoft.
- Designed from the ground up to be as rugged as they come, the GoBook Q200 handheld computing solution is ideal for mobile workforces that operate in demanding mission-critical environments.
- Inside the rugged sealed enclosure systems is the popular X-Scale 400 MHz processor from Intel that enables powerful processing, high performance Windows CE applications and simplified custom application development.
