

MobileMapper Pro

Industrial Strength Mapping Solutions

- MobileMapper Pro from Magellan Professional is a mobile mapping system combining full GIS data collection and navigation software in a handheld receiver.
- MobileMapper Pro provides real-time accuracy to within three meters. With Post-processed Differential Correction, the Mobile Mapper Pro delivers sub-metre accuracy for half the cost of comparable solutions.
- Rubber-armoured, highly shock resistant and waterproof to IPX7 standard, making it ready to perform in even the harshest work environments.
- Displays GIS files in full-colour maps, making it easy to work with complicated and unfamiliar GIS data sets.
