

ProMark 3

Rugged Professional Survey Solution

- ProMark 3 continues the Magellan GPS tradition as the next generation of easy-to-use, turnkey survey systems.
- Delivers centimetre, post processed positioning for accurate surveys as well as sub-metre accuracy in real-time for GIS/mapping and navigation.
- It is highly shock and water resistant, designed to perform even in the toughest environments.
- All the required hardware and software needed to perform fast centimetre accurate static, stop & go, and kinematic surveys, as well as GIS/mapping, is ready to go, right out of the box.
