

## 8200HP Receiver

- The OmniSTAR 8200HP receiver is a sturdy, low maintenance, cost efficient L-brand capable receiver.
- The standard 10Hz position output enables accurate positioning, even under high dynamic or high-speed circumstances.
- Its rugged, waterproof enclosure protects the receiver against accidental drops and keeps the receiver working even in severe weather conditions.
- The field-upgradeable software eliminates the need to return the receiver to the factory in case a firmware upgrade is issued.
- The receiver has front-panel LCD screen in combination with four operating buttons. No need for computer or PDA anymore when you want to know or adjust the current settings.
